

HAPPY HOMES OR SLUMS?

ANGER BEHIND THE CABINET'S PLAN.

BIG CITIES FIRM.

12 HOUSES PER ACRE THE LIMIT.

From Our Own Correspondent.

MANCHESTER, Sunday.

Mr. Arthur Griffith-Boscawen's statement that he has accepted the Manchester scheme as the basis on which the new housing subsidy should be given to municipalities is not so generous as may appear on the surface.

It is an essential part of the Manchester scheme that the subsidy must be 20 per cent. of the cost of the houses.

12-YEAR-OLD GIRL BURGLAR.

TOOTH-PRINT CLUE ON A CANDLE.

From Our Own Correspondent.

NEWPORT (I.O.W.), Saturday.

Night adventures of a 12-year-old girl were related to the Isle of Wight magistrates today when they heard before them Winifred Peggy Weeks, against whom were three charges of burglary.

The police story was that on the night of Jan. 28 and 29 and Feb. 10 burglaries were committed at a house at Freshwater about 20 yards from Peggy's home. Entrance was gained through the front sitting-room window, which was unlocked, and money was missing after each visit.

A MAKER OF HUMOUR.

MINISTER RECITES FROM F. W. THOMAS.

From Our Own Correspondent.

NEWPORT (I.O.W.), Saturday.

A packed audience in the school hall of Gospel Oak Wesleyan Church on Saturday night found the humour of F. W. Thomas, of the "Star," irresistible. The evening was one long ripple of merriment.

The occasion was a humorous recital by the Rev. G. A. Parkinson, entitled "F. W. Thomas, a maker of good humour." Mr. Parkinson recited seven of Mr. Thomas's stories.

The Crossing-keeper, "a" was a merriment old man, a kindly young fellow, and a humorous story-teller all in one breath, and the audience followed every line of an exuberantly funny yarn with delighted attention.

The humour of F. W. Thomas, said Mr. Parkinson, was a merriment old man, a kindly young fellow, and a humorous story-teller all in one breath, and the audience followed every line of an exuberantly funny yarn with delighted attention.

RESCUES BY ROCKET.

CREW HAULED UP 300-FOOT CLIFF.

From Our Own Correspondent.

NEWPORT (I.O.W.), Saturday.

A dramatic rescue of the crew of the launch "The Breeze" from a 300-foot cliff was effected by the use of a rocket.

The launch "The Breeze" was driven against the cliff and upon signals of distress being made the Breeze Company crossed the river, dragged the launch up by means of a small private cable, which is as much as my command of English permits.

THE FONTAINEBLEAU PHILOSOPHERS.

(CONTINUED FROM PAGE ONE.)

Special Correspondent has nothing to do with a Tolstoyan love of work for work's sake. It has to be infinitely associated with the Fontainebleau Institute with certain ideas and is only one of the belief-stages in the education of the student.

In the same way, the dancing which forms an important part of the curriculum is intended to develop particular mental faculties, each dance being an exercise associated with a mental problem.

According to Gurdjieff and Ouspensky, the dance is the exercise which they have closely studied on the spot, are of this nature, though the exercises themselves have lost almost all knowledge of their true significance.

After some years of this wandering life they found themselves in Constantinople, and from there drifted across Europe till they pitched their camp in the famous forest near Paris.

My book, telling of our discoveries so far as they have gone, should be out this summer," Mr. Ouspensky stated. "I am thinking of calling it 'Fragments of an Ancient Teaching'."

In the meantime I am lecturing before small private clubs, which is as much as my command of English permits.

"When students have once got over the initial difficulty of thinking along new lines and grasping the meaning of the terms employed, which may sometimes take a good many weeks—they make steady progress in quickness of perception and understanding, even without taking a course at the Institute."

"The difficulty on our side is to

translate our discoveries into modern forms, but I hope that there, too, progress is being made."

GRADUATED RAIL FARES

A Means of Encouraging Long Distance Travel.

As a means of encouraging long-distance travel, which is now hindered by high fares, the "Railway Gazette" points to the possibilities of a graduated scale of fares.

It suggests that "tickets for continuous journeys of 100 miles or more should receive a reduction of 10 per cent., with a further 5 per cent. for each 50 miles beyond, would do much to meet the demand for reduced charges for long journeys."

ARMY'S NARROW ESCAPE.

Only after a narrow escape was the rescue of two officers of the Naval Flying Boat No. 11, which came to grief in Weymouth Bay during the week-end.

On board were 11 men and a crew of 12. The rescue was effected by the use of a small boat, which was lowered from the ship.

NO DANCING AT OXFORD.

WHAT WILL DR. FARNELL DO NEXT?

The latest decree of the Vice-Chancellor of Oxford (Dr. L. B. Farnell) that under "latus tractus" no longer attend public dances has caused strong feeling in the university and in the town generally.

There has always been a rule, an Oxford man told a "Daily News" representative yesterday, that undergraduates should not go to dances in the town, but it has been interpreted more in the breach than in the observance.

This term there has been a tightening-up, and instead of strolling the streets

when dances are on, the proctors have been entering the ballrooms and compelling the men to leave. Undergraduates caught on the floor have had to pay fines averaging 2s. for each offence.

The dances have been held this week at a loss, because the men no longer care to run the risk of encountering the proctors.

Undergraduates are wondering what their Vice-Chancellor is going to do next.

SHOOTING AT CLAPHAM.

Alleged Revolver Incident Between Brothers.

An alleged shooting incident in King's Avenue, Clapham, on Saturday afternoon will form the subject of a local police court charge to-day.

It is stated that the painter named Smith was at work on a house in King's Avenue, when his brother approached him. A heated argument ensued, and after which the two went away for a short time.

The painter then returned to his work, and it is alleged that his brother came back unannounced and that a revolver shot was fired, but missed the painter.

GRATITUDE TO MUSEUM.

Request of Valuable Silver by a Tailor.

A magnificent addition has been made to the collections of silver in the Victoria and Albert Museum, by that being acquired by the late Mr. Frank Smith, a tailor of Blackheath. It was on view to the public for the first time on Saturday.

In Room 33, there are two new cases, containing in all 52 pieces of English and Irish silver.

Mr. Smith began to collect old china of the age of 16. Later he opened a tailor's shop, and by his thrift was able to acquire for the Museum certain pieces of silver which its collection lacked, in return for the help and information he had received there. The present valuable collection was thus built up.

When Arthur E. Watts (61), collector of Potlatch, pleaded guilty at Maidstone Assizes on Saturday to fraudulently converting money to his own use, he stated that more complaints had been received, but not investigated. Sentence was therefore deferred.

CHARLES HARRIS, ex-servicing officer of Sherrin's, indicted at Kent Assizes for murdering his wife, was charged with cutting his throat, was certified mentally unfit and ordered to be detained at his Majesty's pleasure.
